

Beware!

Vote “NO” on Amendment 1

“Clean Missouri” is Dirty Business!

What’s the true agenda of the “Clean Missouri” ballot initiative (Amendment 1)?

The ballot initiative known as “Clean Missouri” -- in a guise to bring about needed ethics reform in government -- is in reality an attempt to oust Republicans from conservative strongholds and increase the number of Democrat legislators. As there are virtually *no Democrat pro-life legislators*, this is likewise an attempt to destroy pro-life legislative efforts in Missouri.

- The true agenda is to take away representative government by supposedly making legislative districts bipartisan.
- The real impact would be helping pro-abortion Democrats get control of state government.
- “Clean Missouri” supporters include Planned Parenthood Great Plains and Planned Parenthood of the St. Louis Region and Southwest Missouri.

Vote “NO” on Amendment 3

Open Door for Public Funding of Human Cloning/Unethical Research

Amendment 3 is being sold as an amendment to legalize medical marijuana in Missouri. While it does do that, it also creates a whole new bureaucracy, operating largely outside of any legislative oversight, with access to millions of state dollars.

- Amendment 3 from Missouri Right to Life’s perspective creates the Biomedical Research and Drug Development Institute Trust Fund without prohibiting the use of its funds for embryonic stem cell research (ESCR) and human cloning.
- It has been initiated by and will be run by a supporter of embryonic stem cell research and human cloning.
- These are the same reasons MRL opposes open-ended appropriations to the Life Sciences Research Board and the Missouri Technology Corporation without prohibiting the use of funds for ESCR and human cloning research.
- Amendment 3 is yet another attempt to access state money for unethical research.

On November 6, Vote “NO” on Amendment 1 and Amendment 3!
